v **t** ~~For the enemy mob in Minecraft Dungeons, see *MCD:Wither Skeleton*.~~

A **wither skeleton** is a tall, black variant of a skeleton equipped with a stone sword. They inflict the Wither effect when attacking the player. They are found exclusively in Nether fortresses and are the only source of wither skeleton skulls, as well as the only renewable source of coal.

Spawning

Wither skeletons can spawn in Nether fortresses at a light level between 0 and 7, in groups of 5^[*JE only*] or 2-3^[*BE only*]:

- In the structure bounding box of any single piece of the Nether fortress they can spawn on any block
- In the larger area bounding box of the entire Nether fortress they can spawn exclusively on Nether bricks

They are the only mobs that can spawn inside wither roses due to their immunity to the damaging effect.

Spider jockeys

 This feature is exclusive to *Bedrock Edition*.

Spiders and cave spiders spawned in the Nether using commands or spawn eggs have a 1% chance to spawn as a spider jockey, with an 80% chance of that spider being ridden by a wither skeleton.

Halloween

 This feature is exclusive to *Java Edition*.

On Halloween, wither skeletons have a 22.5% chance of spawning wearing a carved pumpkin and a 2.5% chance of spawning wearing a Jack o'lantern. They are never dropped.

Withers

 This feature is exclusive to *Bedrock Edition*.

The wither spawns 3-4 wither skeletons when below half health on Normal and Hard difficulties.

- 8.5% chance of dropping their unenchanted stone sword which has a random durability. This chance increases by 1% per level of Looting, for a maximum of 11.5% chance with Looting III.
- 5 experience orbs when killed by a player or tamed wolf, and an additional 1–3 is dropped per piece of naturally-spawned equipment that *does not* drop upon death.
 - Because all wither skeletons spawn with a stone sword, each of them effectively drop 6–8 if the sword is not dropped.

- If the wither skeleton *does* drop its stone sword, it drops the default 5 instead.
- A carved pumpkin or jack o'lantern worn by a wither skeleton spawned on Halloween is never dropped.

Behavior

Wither skeletons wander aimlessly when idle. They sprint to attack players, iron golems, baby turtles, piglins, and piglin brutes within 16 blocks.

When an entity is attacked by a wither skeleton on any difficulty, it is inflicted with the Wither effect for 10 seconds, which turns the health bar black (♥ × 10) and decreases it by 1 (♥) every two seconds. Unlike Poison, this effect can cause death.

Wolves are aggressive toward wither skeletons, which retaliate when attacked. Wither skeletons flee from wolves in *Java Edition*, but do not in *Bedrock Edition* because they are part of the skeleton family and wolves attack any mob from that family.^[1] Despite being associated to iron golems, villagers and wandering traders are ignored by wither skeletons. However, a wither skeleton can retaliate if a firework rocket set by a villager hits it.

In Normal and Hard difficulties, some wither skeletons pick up dropped equipment. The chance depends on regional difficulty, with up to 55% of them capable of picking up swords higher than stone tier plus any armor. Wither skeletons never take bows; in *Java Edition*, if they hold a bow (which can be done with `/summon wither_skeleton ~ ~ ~ {equipment:{mainhand:{id:bow, count:1}}}`) they shoot flaming arrows even if their bows are not enchanted, dealing the same damage as a normal skeleton would plus an additional 4 (♥♥) of fire damage. If the wither skeleton is holding a tipped arrow or spectral arrow in its off-hand, it shoots that type of arrow, and the arrow held is not consumed. They cannot use crossbows.

Wither skeletons are immune to fire and the Wither effect. They still seek shade or water during daylight if they are in the Overworld, even though they do not burn in sunlight.

As they are also under the "skeletons" entity type tag, if a wither skeleton (only possible through commands) kills a creeper, the creeper drops a music disc, randomly selected from 13, cat, blocks, chirp, far, mall, mellohi, stal, strad, ward, 11, and wait.^[*Java Edition only*]

Being an undead mob, they are:

- damaged by the status effect Instant Health and healed by the status effect Instant Damage.
- unaffected by the status effects Regeneration and Poison.
- ignored by the wither.
- affected by the Smite enchantment.
- unable to swim in water, but do not drown.
- a threat to armadillos, causing them to hide in their shell.

Due to their height of 2.4 blocks, they cannot fit through openings 2 blocks tall.
