

Share article feedback

For the block for manual crafting, see Crafting Table. For other blocks that can be used to combine items, see Workstation.

A crafter is a low-capacity storage block that can use its contents to craft items when given a redstone signal, ejecting the results into the world or into a container it is facing. Its inventory slots can be individually locked so hoppers and similar blocks cannot fill them, while not affecting crafting recipes.

Obtaining

Breaking

Crafters can be mined with anything, but [pickaxes](#) are the quickest.

Block	 Crafter
Hardness	1.5
Tool	
Breaking time (sec) ^[A]	
Default	2.25
 Wooden	1.15
 Stone	0.6
 Copper	0.45
 Iron	0.4
 Diamond	0.3
 Netherite	0.25
 Golden	0.2

Legend

-  incorrect tool, drops nothing
-  correct tool, drops nothing or something other than the block itself
-  correct tool, drops the block itself
- * can be instant mined

1. These durations ignore other influential factors (e.g., [Mining Fatigue](#)) and are measured in seconds. For more information, see [Breaking § Speed](#).

Crafting

Ingredients	Crafting recipe [hide]
Iron Ingot + Crafting Table + Redstone Dust + Dropper	

Usage

In *Java Edition*, crafters cannot be moved by [pistons](#).

Container

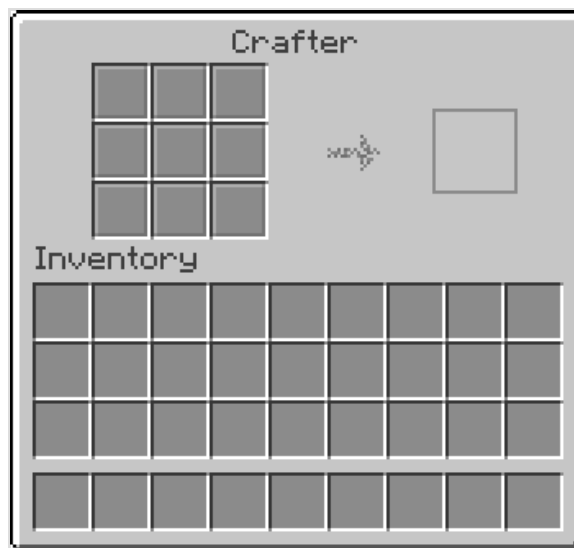

A crafter has nine slots of inventory space, arranged in a 3-by-3 grid like a [crafting table](#). Its GUI can be accessed by [using it](#).

A slot can be enabled or disabled, which can be toggled by clicking on it when empty. Disabled slots cannot have items put in them.

[Hoppers](#), [droppers](#) and other crafters interact with crafters by inserting items into its inventory. Hoppers can remove ingredients as well. When an item is added:

- The crafter will look for an empty slot to insert that item into. It searches in standard reading order.
- So it searches the slots in this order: top left, top center, top right, middle left, middle center, middle right, bottom left, bottom center, bottom right.
- Only enabled slots are checked.
- If the crafter has all enabled item slots filled, then the item is added to the lowest count item stack of the same type. If there is a tie, it uses the same reading order described before.^[1]

Hoppers and droppers can interact with all sides of the crafter, and added items follow the rules described above.

The crafter's GUI in [Java Edition](#).

A simple contraption for crafting [cake](#) using the crafter

Redstone component

See also: [Tutorial:Crafter](#)

When a crafter receives a redstone signal, it waits for 4 game ticks (0.2 seconds) before ejecting one crafted item using the ingredients from the nine inventory slots. The crafted items are subsequently ejected from the front of the crafter. If the front of a crafter is facing a container (including another crafter), the crafted items are transferred into the container. If the container it is facing is full, or the item cannot be inserted into the container, the crafter ejects the item instead. Crafters interact with containers [similar to droppers](#). If a recipe has byproducts (e.g. empty bottles for honey blocks or empty buckets for cake) those are ejected after the crafted item.

For shaped recipes, the position of the items in the inventory matters. Because disabled slots prevent items from entering the slot, crafters can be used to craft any item in the game automatically without any input from the player, using a series of hoppers and/or droppers and the correct configuration of disabled slots for the recipe.

A hopper placed below a crafter collects the ingredients from the crafting grid, not the resulting item.

In [Java Edition](#), unlike [dispensers](#) and [droppers](#), crafters aren't affected by [quasi-connectivity](#).^[2]

Comparators can emit a redstone signal when reading from a crafter. The signal strength is equal to the number of crafting slots that are either disabled or occupied by an item. ^[3] The stack size of the item has no effect on the comparators output signal e.g. having 1 stick in a slot vs having 64 sticks in that same slot both output the same comparator signal. An empty crafter with no disabled slots does not output any signal through a comparator. A crafter with every slot being disabled or containing an item (of any stack size) outputs a signal strength of nine through a comparator.

orientation	Not Supported	down_east	down_east down_north down_south down_west east_up north_up south_up up_east up_north up_south up_west west_up	Unsupported	The direction the crafter's <i>face</i> is facing and which way it is rotated.
triggered_bit	Not Supported	false	false true	Unsupported	Whether the crafter is activated.

Block data

A crafter has a block entity associated with it that holds additional data about the block.

Java Edition:

See also: *Block entity format*

Block entity data

Tags common to all block entities

- crafting_ticks_remaining**: Set to 6 when the crafter crafts something. [*more information needed*]
- triggered**: Set to 1 when it is powered. It is otherwise 0.
- disabled_slots**: Indexes of slots that are disabled.
- Items**: List of items in this container.
 - : An item in the crafter, including the slot tag. Crafter slots are numbered 0-8. 0 starts in the top left corner.
- An item**
- lock**: Optional. An item predicate representing the "key" to open this container.
- item predicate**
- LootTable**: Optional. Name of the loot table to use. If this is used in a chest-like container, the loot table generates its content when it is opened. Generating the items in the container removes both loot table tags (**LootTable** and **LootTableSeed**). Is not preserved when removed.
- LootTableSeed**: Optional. Seed for generating the loot table. The default value works similarly to the seeds for worlds, where value of 0 or an omitted value causes the game to use a random seed.

Bedrock Edition:

See *Bedrock Edition level format/Block entity format*.

Announcement

October 15, 2023 (https://www.youtube.com/watch?v=DnY5xz11IR0&ab_channel=Minecraft)	   Crafters were announced at Minecraft Live 2023 .
---	--

Java Edition

<i>Java Edition</i>		[hide]
<div> <div>1.20.3</div> <div>— Experiment —</div> <div>Update 1.21</div> </div>	23w42a	<div>    </div> <div>Added crafters behind the "Update 1.21" experimental data pack.</div>
		Crafters currently activate after one game tick .
	23w43a	<div>    </div> <div>The textures of the crafter have been changed.</div>
		Slots can no longer be toggled by hotkeys; instead, hotkeys place items into the crafter normally.
	23w46a	<div>    </div> <div>The textures of the crafter have been changed again.</div>
		Crafters now activate after 2 redstone ticks (4 game ticks), like dispensers .
<div> <div>1.20.5</div> <div>— Experiment —</div> <div>Update 1.21</div> </div>	24w03a	<div>    </div> <div>The top face of the crafter is no longer mirrored.^[4]</div>
1.21	24w18a	Crafters are now available without using the "Update 1.21" experimental data pack.

Bedrock Edition

<i>Bedrock Edition</i> [hide]		
1.20.50 — Experiment — Update 1.21	Preview 1.20.50.21	 Added crafters behind the "Update 1.21" experimental toggle.
	Preview 1.20.50.23	 The textures of the crafter have been changed.
1.20.60 — Experiment — Update 1.21	Preview 1.20.60.20	 The textures of the crafter have been changed again.
1.21.0	Preview 1.21.0.22	Crafters are now available without using the "Update 1.21" experimental toggle.
1.21.20	Preview 1.21.20.21	Crafter craft and fail sounds now have a random pitch offset.
		Crafter fail sound now has a max distance of 3 blocks instead of 5.
1.21.50	Preview 1.21.50.20	Crafters are now mined quickly when using any pickaxe.
	Preview 1.21.50.24	Crafters are mined faster when using an improper tool.

Issues

Issues relating to "Crafter" are maintained on the bug tracker. Issues should be reported and viewed there (<https://bugs.mojang.com/issues/?jql=project%20in%20%28MC%2C%20MCPE%29%20AND%20%28resolution%20is%20EMPTY%20OR%20resolution%20in%20%281%2C%202%2C%206%29%29%20AND%20%28summary%20~%20%22Crafter%22%29%20ORDER%20BY%20resolution%20DESC>).
